CARBON 4 SOIL QUALITY

Carbon 4 Soil Quality, leads the way in sustainable soil management techniques to store carbon in the soil, combat the greenhouse effect and improve soil health. Through innovative tools and transnational cooperation, we'll set standards, monitor procedures, and develop socio-economic models to test carbon farming across diverse Mediterranean climates. Together, we'll create a resilient agricultural future that supports farmers, food security and biodiversity.

Total budget
€ 598.890,00

Start date: January 2024
End date: March 2026

Project duration
27 months

Interreg Funds
€ 479.112,00
