Summer School

Food & Health

UNIVERSITY OF PADOVA (ITALY) & UNIVERSITY OF SYDNEY (AUSTRALIA)

24th - 29th June 2019

2nd edition

The interaction between food, nutrition, and human disease is a rapidly evolving area of research. The Summer School's program "Food and Health" will bridge the gap between different disciplines by offering a strong multidisciplinary environment, where students will have the opportunity to follow a variety of sequentially related courses on food quality and health.

This Summer School program focusses on the most relevant aspects of food quality and human nutrition, in order to understand how they are related and how they affect human health, through dietary habits.

MAIN TOPICS: "FOOD QUALITY: FROM FARM TO TABLE" & "FOOD QUALITY AND HUMAN HEALTH"

The Summer School is jointly run with scholars from the University of Sydney and from the University of Padova.

Anti-Adulteration and Health unit (NAS), Food and Agriculture Organization (FAO), and the Australian Ambassador in Rome will also participate.

Full programme and further information are available at:

www.tesaf.unipd.it/en/foodhealth

Watch the video of the previous edition here:

www.tesaf.unipd.it/corsi/summer-and-winter-schools/winter-school-food-and-health-2018
